

U.S.S.N. 10/780,845 (DP-309762) - 2

system that includes apparatus for detecting actual collisions but may include supplementary apparatus related to a collision detector itself, including apparatus that attempts to anticipate the probability and severity of such a collision prior to the actual collision detection by determining a target crossing location on a vehicle.

Applicants apologize for any inconvenience that they have caused Examiner as a result of this error.

Respectfully submitted,

A handwritten signature in cursive script, reading "Robert M. Sigler".
